## INTERNATIONAL SEARCH REPORT

n. \_tional application No.

PCT/GB 99/03538

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)						
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:						
1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:						
Claims Nos.:     because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:						
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).						
Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)						
This International Searching Authority found multiple inventions in this international application, as follows:						
See additional sheet						
As all required additional search fees were timely paid by the applicant, this International Search Report covers all						
searchable claims.						
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.						
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:						
4. X No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  1-5,7,8,21-30 (all partially)						
Remark on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.						

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-5,7,8,21-30 (all partially)

A protein having luciferase activity and at least 60% similarity to the luciferase from Photinus pyralis wherein in the sequence of the enzyme the amino acid residue at position 214 is different to the amino acid which appears in the corresponding wild-type sequence and wherein the luciferase enzyme has increased thermostability as compared to an enzyme having the amino acid of the wild-type luciferase at this position. Kit comprising the protein, nucleic acid encoding the protein, cell transformed with said vector and plant comprising such cells. Method for producing the protein comprising culturing such cell or growing such plant. Use of the protein in a bioluminescent assay.

2-36:Claims: 1-30 (all partially)

Subjects 2 to 36:
Each of the eight remaining substitution mutants (at positions 232, 295,14, 35, 105, 234, 420 and 310) of Photinus pyralis; each of the nine substitution mutants (at positions 216, 234, 297, 16, 37, 106, 236, 422 and 312) of Luciola mingrelica; each of the nine substitution mutants (at positions 216, 234, 297, 17, 38, 107, 236, 422 and 312) of Luciola cruciata; each of the nine substitution mutants (at positions 216, 234, 297, 17, 38, 107, 236, 422 and 312) of Luciola lateralis which are recited in the claims.
